-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

Claims 1-7 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In line 1-2 of claim 1, the applicant claims organic EL device having at least two organic electroluminescence layers and electrodes "provided alternately". Here, it is not clear at all, as to what exactly the applicant is intending to claim. It is not clear at all as to how exactly are at least two organic electroluminescence layers and electrodes "provided alternately".

In lines 1-3 of claim 1, the applicant claims organic EL device having at least two organic electroluminescence layers and electrodes provided alternately on an upper layer of an electrode formed on a substrate "respectively". Here, it is not clear at all, as to what exactly the applicant is intending to claim with phrase "respectively".

The applicant is suggested to write a claim or claim limitations, in the manner such that exact order of claimed elements are clearly understood. The applicant may recite exact position of an element by reciting the element and then reciting a second element "directly on top and contacting the first element".

In lines 3 and 4 of claim 2 "the odd numbered electrodes" and "even numbered electrodes" lack antecedent basis.

In lines 2-3 of claim 3, it is not clear as to what exactly applicant means by "wherein an electrode for transmitting a light which is electroluminescence emitted is set to be transparent electrode".

In lines 3-6 of claim 3, it is not clear as to what exactly applicant means by a metal film is formed of... "...which is to be the cathode and the organic EL layer". A similar situation appears in claim 5.

Art Unit: 2879

Regarding claims 1-7, claims 1-7 are so informal (see rejection of claims under 35 USC 112, second paragraph) that no meaningful examination can be undertaken at this time. See MPEP 702.01.
